ADVANTAGES SHRIMP POWDER

**ITEM NAME : Advantage Shrimp Powder**

**ITEN NO. : ASP0S / ASP01 / ASP02**

## Features :

ADVANTAGES SHRIMP POWDER is the main food for fish and shrimps. It is made of the modern scientific technology. It is helpful to the larva of fish and shrimp. It has shown a high success in use by aquaculture ponds.

## Ingredient:

Crude Protein	above 52.0%
Crude Fat	above 10.0%
Crude Fiber	under 2.9%

## Adaptable period:

The most suitable stages are from M<sub>1</sub>, M<sub>2</sub>, M<sub>3</sub>, PL<sub>1</sub>, PL<sub>2</sub>, ..., PL<sub>15</sub>

## Dosage:

Put 1g ~ 50g in one m<sup>3</sup> of sea water. Dosage and times of usage is increased by needed.

Packing: 1KG/BAG, 20BAG/CTN

# ROART

**ITEM NAME : ROART**

**ITEN NO. : RF03**

**Ingredient:**

Crude Protein	Above	56%
Crude Fat	Above	25%
Crude Fiber	Under	3%
Ash	Under	2%
Moisture	Under	3%

**Packing: 500g/Bag, 10Bags/Ctn**

**Features:**

- 1.The excellent buoyancy in the middle level of water, easy consuming for shrimp larva and fish fry.
- 2.Excellent buoyancy and highly attractive, totally enhance growth formula.
- 3.Enriched omega-3 (n-3) long chain polyunsaturated fatty acid.
- 4.Balance of all comparative nutrition more easier for digestion and absorption of shrimp larvae.
- 5.Enriched above 9 kinds of nutrition that shrimp larva could not produce by itself and special formula for larvae direct absorbing.
- 6.The particle of micro encapsulated feed is more suitable for shrimps and other high economic aquaculture dieting.
- 7.The real initial stage diet with rich Vitamin, lechitin and chitosan , ... etc. for shrimp larvae and fish fry.
- 8.Suitable to each larvae stage from Z1, Z2, Z3, M1, M2, M3, P1, P2, ... , P6.
- 9.High replaceable diet of rotifer and artemia.

# M.B.

The best micro encapsulated aqua-larval feed

ITEM NAME: HAI-YU M.B.0/1/2  
INTEM NO.: SUP0S/SUP01/SUP02

## Ingredient:

Crude Protein	Above	56%
Crude Fat	Above	27%
Crude Fiber	Under	1%
Ash	Under	5%
Moisture	Under	3%

## Features:

1. The best hatchery pond nourishing and fertilizing treatment feed in shrimp hatchery arena.
2. Enriched omega-3 ( n-3 ) long chain polyunsaturated fatty acid.
3. The best water stability larva feed even heavy load feeding.
4. Balance of all comparative nutrition more easier for digestion and absorption of shrimp larva.
5. Suitable to each larva stage from Z1, Z2, Z3, M1, M2, M3, P1 - P6.
6. It offers the best sheltering watercolor for larval environment.
7. Enriched above 9 kinds of nutrition that shrimp larva could not produce by itself, and special formula for larvae directly absorb.
8. Better direct absorption rate than any other larval feeds.

Packing: 500g/Bag, 10Bags/Ctn

# ROTIF

The Genuine Artificial Rotifer

ITEM NAME: HAI-YU ROTIF

INTEM NO.:RF01/RF02

Ingredient:

Crude Protein(%)	Above 53.2%
Crude Fat(%)	Above 7%
Crude Fiber(%)	Under 3%
Ash(%)	Under 2%
Moisture(%)	Under 6%

Dosage: Put 0.5g~1g in 1M<sup>3</sup> of sea water.  
Dosage and times of usage are increased by needed.

Packing: 500g/Bag, 10Bags/Ctn

Features:

- 1.Use advance technology of micro-encapsulation and have been proven more performance in hatchery pond.
- 2.Excellent buoyancy and highly attractive, totally enhance growth formula.
- 3.Enriched omega-3(n-3) long chain polyunsaturated fatty acid.
- 4.Balance of all comparative nutrition more easier for digestion and absorption of shrimp larvae.
- 5.Enriched above 9 kinds of nutrition that shrimp larva could not produce by itself and special formula for larvae direct absorbing.
- 6.The particle of micro encapsulated feed is more suitable for shrimps and other high economic aquaculture dieting.
- 7.The real initial stage diet with rich Vitamin, lechitin and chitosan , ...etc. for shrimp larvae and fish fry.
- 8.Suitable to each larvae stage from Z1, Z2, Z3, M1, M2, M3,
